

Glass House Group Internship

The Good of Cannabis, For the Good of People

Are you interested in gaining experience in the cannabis industry?

We are Glass House Group: one of California's largest vertically integrated cannabis corporations; and we are looking for talented interns who share our values. As pioneers in multiple sectors of the industry we are proud to offer a Seed To Sale Internship Program. Our program will allow you to gain experience in Cultivation, Compliance, Manufacturing, and Retail.

The Seed To Sale Internship will consist of 6 weeks on 6 topics: propagation, cultivation, processing, compliance, manufacturing, and retail.

Cannabis for us is about healing, environmental awareness, and people. Our ideal candidate will share these values along with a strong passion for cannabis. Passion comes in many forms: you could be a regular user, a believer in the plant's benefits, or a lover of the culture. Candidates should be engaged in an associated field such as: business, agriculture, retail, marketing, or chemistry. Our program will require interns to work early hours and communicate with a wide array of people. You must be comfortable with farm work, computer use, Microsoft office, and basic customer service.

This internship will be paid and can be used for school credits.

Applications must include a resume and cover letter. We also ask that applicants fill out an application form, and answer 4 short answer questions.

This is a paid internship, and all candidates must meet the following qualifications to be considered:

- Must be 21 Years Old
- 3.0 GPA or Higher Required
- Minimum 2 Years Job Experience (Part-time ok)
- Currently Enrolled in Accredited College or University
- Mon-Fri availability, hours will change each week
- Travel will be required, access to a vehicle recommended
- Must work a minimum of 40 hours a week

1.) What excites or interests you about the cannabis industry?

A large, empty rectangular box with a light green background, intended for the user to provide their answer to the first question.

2.) What do you hope to learn in this internship and how will it apply to your career path?

A large, empty rectangular box with a light green background, intended for the user to provide their answer to the second question.

3.) What is your personal relationship to cannabis?

4.) If you could have one superpower to change the world what would it be?
